

BULLANT CREATIVE

Now let's make it work!

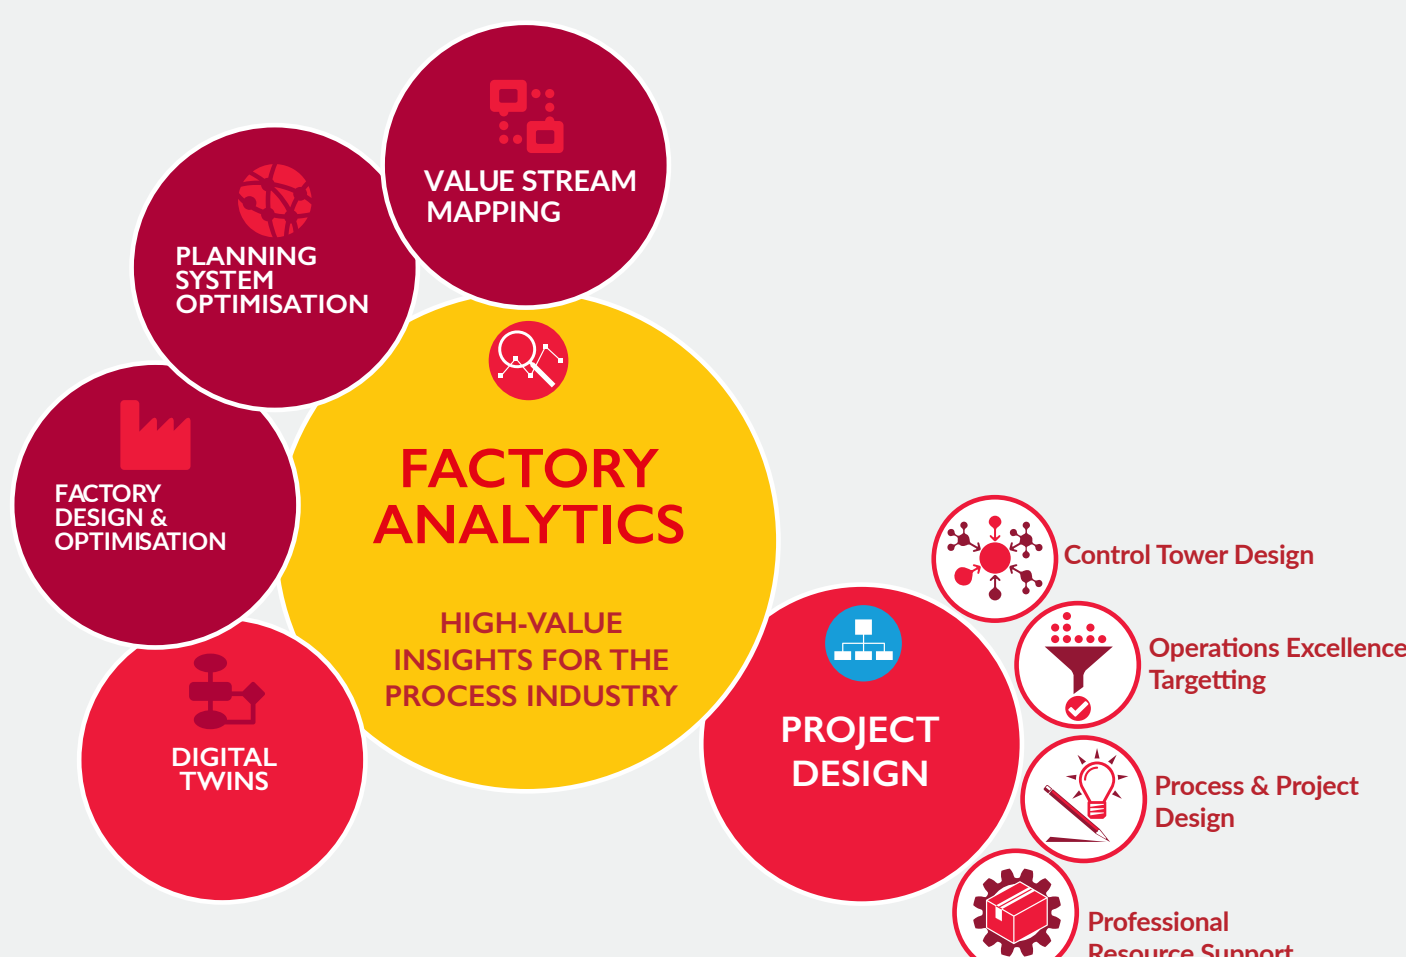

FACTORY ANALYTICS AND PROJECT DESIGN FOR THE PROCESS INDUSTRY

WHAT WE DO

We apply factory analytics techniques that produce high-value business insights for the process industry. We then use these insights to provide project design services that maximise your Return on Total Assets (ROTA).

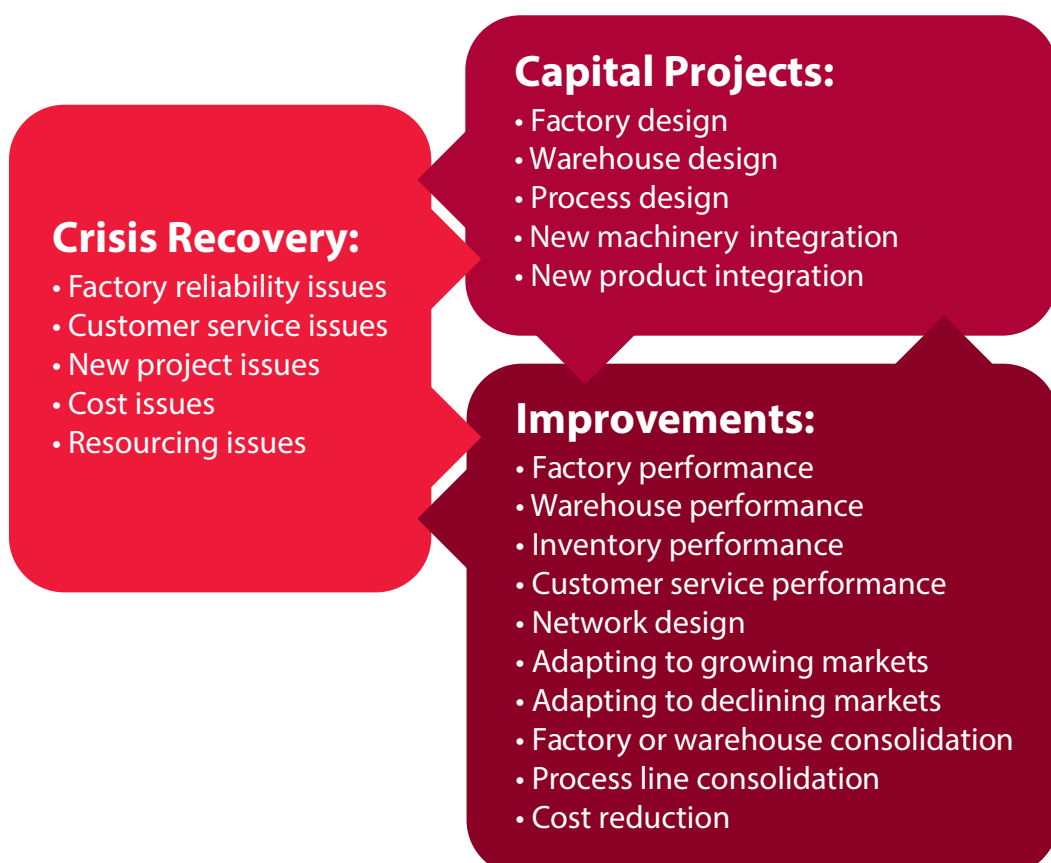

Our factory analytics services incorporate the latest thinking in artificial intelligence and supply chain modelling.

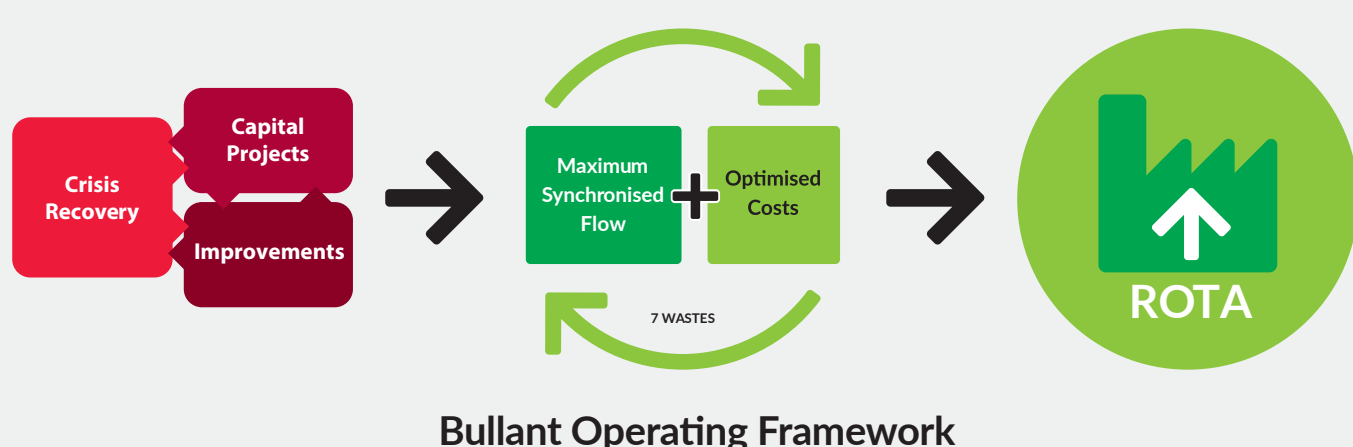

WHEN WE DO IT

Our services are requested when help is needed in a crisis, when planning is required for major projects or when improvements must deliver business outcomes.

HOW WE DO IT

Our secret ingredient is our operating framework which maximises synchronised flow and optimises costs. This unique framework is how we consistently deliver a higher Return on Total Assets (ROTA) when applying our factory analytics and project design services.

WHO WE ARE
